The State of Colorado has taken our right to use our Court
Decreed water rights. I developed 3 irrigated quarters and
watered them for 38 years. In 2003 a Colorado District Judge shut
off completely 4000 irrigation wells including my three. There is a
ocean underneath us - it's not a lack of water, it is
political. We would like to utilize our land and water and
equipment to help ease the fuel situation with ethanol.
